The Eiffel Tower

Many countries try to build preferential building, tower or landmarks to attract many of visitors to its, it is a great idea, because most of landmarks tells us about cultures of these country in easy way to remember it, I think we have many of landmarks in many places right now such Eiffel Tower in France, big pen in Britain, Statue of Liberty in U.S and Twins tower in Malaysia. I will give some information about Eiffel Tower in this paragraph because I love its shape and I hope to visit it as soon as possible, because France one of the best places in world.

The Eiffel Tower is one of the most famous towers in Europe and also in the world. It is famous because it has a strong design. The Eiffel tower was designed by the French engineer and bridge builder Alexander Gustavo Eiffel. In 1898, Alexander Gustavo's design won, when the French government organized a championship to determine who could design the best tower or sight for France. There were more than 100 engineering designs submitted in that competition. Eiffel's design was selected by the France government.

Hassan

The tower is 300 m high and weighs 7000 tons. It consists of an open iron framework, which made the highest manmade structure in the world at the time. The Eiffel has 18,038 iron pieces, and it needs tons of paint for painting it every seven years. Its paint color is dark brown. The base of the tower covers a square area of 100 m on a side. Today, the Eiffel Tower is one of the largest attractions at the exposition, from the view place of the Eiffel tower, you can see far away, especially on a clear day. It's beautiful if you stand in the center of the area at the base and look directly up at the floor of the second level.

My Scholarship

When I was in high school I had a big dream, I wanted to finish my studies in the U.S.A. But I always ask myself: How can you study in the U.S.A?. Sometimes I was thinking about my father, would he be able to send me? would he like to?

When I graduated from high school, I had a lot of colleges I could enter, but I still wanted to finish my studies in the United States!! In this time, the Ministry of Education wants to send a lot of students to the United States. When I heard this news, I didn't believe it. After that I believe it.

I was ready for all requirements, so I got visa, and an I-20 from Kansas State University. After that, I went to the Ministry of Education to give them all the necessary they want, and they gave me the ticket. The last day for me in Saudi Arabia I was with my family to say goodbye, and I went to the airport, and I came to the America.

My Country

My Country is Saudi Arabia - It is a good place - It is in the Middle East - It has many cities . Some of the cities are big like Jeddah, Dammam and Riyadh.

Saudi Arabia has petroleum in Dammam and some of the other cities - Jeddah, Dammam and Riyadh, They have taller buildings, especially in Riyadh -

Saudi Arabia has two seas in east and west Saudi Arabia - They are very nice -

Saudi Arabia has 11 universities in different cities and many colleges - Most of Saudi Arabia is desert - The capital city is Riyadh - There are people 20 millions in Saudi Arabia.

The New Life

I call this stage of my life "The New Life" because I am feeling in a new position. This new feeling is very nice to me. I like the change.

My new life started when I arrived to the U.S. and I started my studies. This position let me feel happy. This beginning change a lot of think in my plan for my future, and let me re think once more.

If you dream at one day doing something, and you wake up and you find yourself in the middle of this dream, but now it is happening, this feeling might ~~sur~~ surprise you and you will think you are still dreaming. I have to keep doing my duties to finish this dream.

I wish to wake up, but when I am ready to finish this big dream of success, and I want to be ready to make this dream true.

Finally, I think every has a dream, but the way of achieving. This dream differs from one another. There fore I hope everyone would be satisfied with his dream.

My New Family.

All my family is important to me, but today I want to talk about my new family, my wife. Her name is Montserrat. She is very strong and virtuous woman, and I love it. She has a huge heart and she is always thinking of how she can help someone. She is beautiful, intelligent and a very good friend. I love her character so much: she is very natur and understanding. She is always my support, and specially in difficult moments as I lived four months ago. She loves me and respects me so much. My wife is a very

sweet woman.

We believe in the dreams, like forming a big family, being a good person to help people, being good professionals and always walking with God. Sincerely, we have many plans and many dreams, but the most important for us is to get a better education, in order to give in the future a very good education and health for our children.

She wants to study a master's degree in architecture in the U.S, especially at Kansas state University because here is a very good place to study this career. I agree with her that that will be very important for her, and

I always want Montserrat to be happy.

Finally, I am very happy to find her in my life. She completes me so much. The best for us is that God always was present between us. I hope, and I believe, that some day I can form a beautiful family with my wife. I love so much her.

WEDDING AND MARRIAGE

I believe marriage is very important for people, because each person needs a spouse for relaxing from work, keeping his /her children, good study, cleaning a house and continuing the human life. Also, marriage will help us to remove a lot of problems in our life for example, we will sleep early every day, but before the marriage we don't sleep early, because no body wait for us at home so, we don't come back home early. Good way to have kids is get married. We should get married, before we become old.

Everybody needs loving from other people, actually from his wife or her husband. Men and women can't live alone .I mean men need women for cooking and caring for their children and women need men for taking care of them. Everybody likes to get married, but he should know about marriage requirements before gets married. There are some notes everybody should know it to be able to get married comfortably. The first one, he may need to buy car, TV, twin bed and some furniture. The second one, he should trade with her kindly.

In many countries, men get married late, but I think this is a problem which must be corrected by their government. I know some of these people will say "they don't have enough money", but they can remove this problem by lowering the cost of marriage. This is one solution and there are many solutions. In the Islam religion, people usually get married as soon as possible. Some people in Saudi Arabia, they usually get married with his cousin and this reason was agree by their parents. If you are planning to get married just keep going a way.

Finally, I hope everyone gets married as soon as he or she wants, to eat good food and lives in an organized home. Additionally, wedding nice time to meet your family and friends. Hopefully, you chose furniture (kitchen, refrigeration, stove,) with your suppose, because it is good time to know her correctly. It is excellent idea to decide when will you be married.

Kinds of Horses

Hundreds of years ago, people used horses for travel and war. These kinds of animals were very important in the past, but now I think they are for fun and sport.

I have been riding horses for a long time. I'm a rider of jumping horses, but I have a lot about the other kinds. The jumping horses should be tall and strong, so they can jump to a high level.

The cross country horses are a kind of jumping horse, but the important thing in this kind, the horse should trust the rider because it's dangerous for both of them,

rider jumps with their horses from natural gaits. These horses jump over 160 cm high and 110 cm wide.

The dressage horses are the most beautiful and nice, because they are technical horses just to ride, not to jump or run.

The running horses are very expensive and they have some different options from the jumping horses.

I hope that I have given you good information about horses.

Why is the childhood education is important?

I think that childhood education is very important. Childhood education give children many kinds of experience. Maybe these experiences decide our lifestyle.

Why is the childhood education very important? I think that childhood education is based on our lifetime. In my experience, I learned most important things during my childhood period: for example, how to make a friend, what is wrong or right and , what is good action or bad action. During our life, these topics are very important. Parents should give many chance to their children to develop their ability during the childhood period. Maybe our future had decided in our childhood . For example, very famous pianists or painters get a special education during childhood. If they didn't get a special childhood education, they couldn't be successful. So childhood education is very important.

Our childhood period is very short. So, when people are young ,if possible, they must learn many thing. Childhood education can influence the our lives.

Essay:

Contribution to Improving Teaching English in US Cultural Centers Abroad

I believe the English Language Program should harmonize using the same books in the US universities and US Cultural centers abroad. This means, recent versions of books and the teaching techniques both should be used in US cultural centers in order to promote the English Language, and to help people who come to the US. In this essay, I will try to explain so that my idea can be accepted one day.

Recent books or new version of books in grammar, reading and listening/speaking should be bought and used at the US cultural centers abroad in developing country. Nowadays many people in different countries take class English classes. They study in these centers to improve their English level in preparing a TOEFL exam, for coming to the US for business, for working in international Institutions, for making them comfortable in international meetings, or to come to study in US universities. For example in the US cultural centers of Niamey in Niger, the 1981 version books are used for teaching English, and their support are cassettes. The World-English-Book-6 is old on 10 cassettes. Besides these books are about few topics, the World-English-Book-6 is almost exclusively on the history one company called General Service Information (GIS). In addition, in these centers there are good teachers, but in limited number so that a same

person teaches many levels of English in grammar, reading and listening/speaking.

I think that providing new editions of books which are about actual life, business or school in the US will help more people in learning English, preparing their exam, or improving their English levels before coming to the US. These old books have not only cassettes as support but they are black-and-white compared to those we are using in the US universities, which are on CD-ROM and well illustrated. I agree that teaching demands a lot of funds, and in developing people are poor and probably can't buy the newest books. It is why I ask governments to help and support cultural centers abroad by providing them new books, more skilled teachers, and also modern audiovisual equipment for both the teachers and the library.

The Famous Horses In The World.

They're many kind of the best and famous horses in the world. First, there is the Royal Altra. Second, the Akalatiky. Then there is the Arabian England French.

The Royal Altra came from Portugal. This kind of horse comes from the 18th century. It has strong shoulders and thighs, and a small body. They are smart and anger too quickly. The average length from the nose to the tail is 150-160cm.

The Akalatiky came from Turkuminstan in Asia. It's one of the most powerful horses and it's very patient. It has a small head long back, a flat body and long legs. It's about 140-150cm in length tall. These horses are undearable and uncontrollable.

The Arabian England French is the best riding horse in the world. It comes from France. It has a wide chest, light thighs and long legs. It's 150-160 cm long. These horses very smart and they have a good behavior.

There are 160 types of horses in the world. Everyone chooses one of his or her needs. I choose the best kind to ride so I can win the races.

Fathers in Saudi Arabia

I want to talk about my father. My father does hard to work for me, my mother, my sisters and my brothers. First, he takes care all of us. For example, he buys our clothes, toys, and food. And if we feel some pains he carries us to the doctor and buys medicine for us.

Second, he teaches us the important education. In fact, he began when we entered elementary school. Also, my father gives us a lot of advice during our teenage years. For example, my father tells us how to choose friend and how not to be with friends who are careless or bad student. My father also teaches us the important Islamic rules. He encourages us to become educated. He teaches us how to serve Islam by our talents and experience.

Our fathers want us to become the best people in the world. They discipline us from the time we are children until now. Finally, everyone shouldn't forget what our did for us and give them anything they want from us. Also, we should obey them and take care of them when they get old.

MYSTERY of TRADITIONS

Tradition affects people's lives directly. This means that all over the world, when the people are born, actually they are influenced by their family or community without noticing it. After that, they live with rules in tradition. I think if a community can keep culture, and can accommodate the conditions of time, children of that community live with tradition. But there are similarities among in the foundations of all traditions. For example, all of them are based on people's healthy lives that are without bad habits.

Actually, all religions serve to form people's lives and to give directions about the non-material world. The target is similar all the time. Religion is the big parts of traditions, so, that is the most important for tradition, if you research about tradition or review the reasons. Essentially, a human was created different from others. This means, there are differences in personality, ability, skills, mind, habits and etc. People are very different when compared in. Some kinds of communities cremate the dead and then ashes are poured into the sea, others bury their dead. Weddings are important for some communities, and where the ceremony takes one week and the bride must be a virgin. However, the couple can't live together without getting married. In some cases, this can cause tragedy, meaning people can die for not following the rules. In some of countries, jealousy may cause people to kill each other. Food also can change from place to place. Every culture has its own taste. For example, in some religions don't eat pork, in others, they don't eat beef. If you live in the same city with people, probably you support the same team, you have the same culture, and you believe the same things. For example, you stay on the same street with your neighbors. This means, you have the same situation as other people who live there. Because of this, there is something that is impossible. This is the classification of people. Likewise, in real life, this is useful for the productivity sector that feeds most people, because each person can think of a unique solution.

There are a lot of actions in our real life: for example, rising, going to school, playing games, getting married, getting old and finally dying. Here, in a different country, city, town or street, these habits can be changed from community to community. Although science doesn't believe in the power of traditions that affect the people, we're living in the real world. We can't live with hypotheses. We must be faithful to our traditions.

essay

Ahmad AlnaKhly

"The Job"

I think the job is really important for all people, and the job equals life for everyone not for me but all people on this earth....

Why that job is too important and we can live without it? because the job is heart of the life when you don't have a job you can't be live. When you get job you will get money when you get money so you win!... you can be live while a little people they don't need to job maybe they have a company or another cause come from it money

→

Contu.....

However, The job it has many causes like doctor, engineering, teacher and farmer...etc. and the job is differently by certificate when you have certificate you have a better job than without it. And when you get better job you get more money because that all people they are taking education and study. When you want a good life you have to take education for you can live easy life. That's all.

Ahmad

A Real Friend

In this difficult life ,you must have a real friend,or person to stay with you when you need help.If is a man or woman ,old or young , thin or fat ,there is no different.But you should have one. What is the meaning of "Real friend" . It is sacrificing , fraternity and love . When you need him , he will be the first person with you.

I will tell you the different between a simple friend and a real friend. A simple friend has never seen you cry ,but a real friend has shoulders soggy from your tears. A simple friend seeks to talk with you about your problems ,but a real friend seeks to help you with your problems. A simple friend thinks the friendship is over when you have an argument, but a real friend knows that it's not a friendship until after you have had a fight .

One wise person from England said "A real friend is one who walks in when the rest of the world walks out." What is a friend ? A single soul dwelling in two bodies.

George Bilby said in a song:

*You know much I'm grateful
god ,for kind and thoughtful friends.
It's folks like these that bring
my life,It's richest dividends.
Because they bring a friendly word,
theyshare a smile or two.
And skies that had a tinge of gray ,
become a brighter blue*
